

# KONAVI™ Broiler Feeder

A Breakthrough in Clean,  
Open-Style Feeding

Let's grow together™

*The new KONAVI™ Feeder gives birds easy access to feed without stepping in it.*

## **Introducing the Broiler Feeder that Lets Beaks In, but Keeps Feet Out**

The new KONAVI™ Feeding System features a streamlined, open design that gives birds easy access to feed for fast gains and consistent performance. Plus, its angled cone with anti-rake fins discourages birds from standing in the feeders. The result is cleaner, healthier feed that keeps birds eating and prevents feed waste.

Count on Chore-Time for  
experience, reliability,  
performance and confidence.

# KONAVI™ Broiler Feeder

## Lets Beaks In. Keeps Feet Out.

### Maximum Feed Access

With its low pan height and patented scalloped edge, the Chore-Time KONAVI™ Feeder invites chicks to eat from the outside of the pan from day one. It gives birds comfortable, easy access to feed throughout their growth cycle. With the KONAVI Feeder, you can flood pans high to attract day-old chicks, and then use one of three grow-out settings for finishing birds.

### Minimum Feed Waste

The KONAVI Pan features a unique angled cone with anti-rake fins that discourages birds from stepping into the feeder and scratching feed out of the pan with their feet or beaks. It helps keep feed clean and uncontaminated – improving feed availability and feed efficiency.

### Complete Cleaning

The simple, streamlined design of the KONAVI Feeder, with no corners or pockets to trap feed, permits more complete cleaning of the feeder. There are no grills to work around. Simply power wash KONAVI Feeders between flocks for better bird health.

### Durable Construction

- Made using heavy-duty, durable polypropylene plastic.
- Engineered to resist the effects of ultraviolet light.
- Eating area of the pan is thicker for long life – 3.8 mm (0.15 inches).

Let's grow together™

Two-piece removable top with floor and colony options makes it easy to change out damaged feeders in minutes.

Optional slide shut-off lets you control feed flow to unused pans.

Rotate feeder to engage one of the three grow-out levels – 19.0, 25.4 or 31.7 mm (0.75, 1.0 or 1.25 inches).

Single lever allows easy opening of pan for cleaning.

High flood window flows feed to the far edge of the pan in a full 360 degrees.

## Designed for Global Poultry Production

Chore-Time engineers designed the KONAVI™ Feeder from the ground up to meet the needs of global feeding practices and houses where minimal or no litter is used. With an ultra-low pan height, it lets the smallest chicks reach the feed even when they are not boosted by the height of the litter. Its simple design also works well in a wide variety of traditional broiler production environments.

## Two Configurations

The KONAVI Feeder is available in floor and colony feeder configurations. Both models also come with and without a slide shut-off so you can easily control feed flow to unused areas of your poultry house.

## Count On It

Chore-Time has been a leader in poultry and egg production systems since 1952. We have the experience to deliver complete solutions for feeding, feed handling, drinking, egg handling, climate control and management systems. You can count on Chore-Time and your independent Chore-Time distributor for equipment reliability, production performance and ultimate confidence.
